**TVAC40800**

## Cat 5 cable 1m

This network cable is used to connect your network camera e.g. to a router or PC. The cable with a twisted pair of wires (twisted pair cable) is available in different categories. Category 5 (CAT 5) is used for wiring IP camera and computer networks, such as fast ethernet. Thanks to this, high data transfer speeds of 100–MBit/s are guaranteed. The CAT 5 network cable is available in a length of 20 m (TVAC40850), 10 m (TVAC40840), 5 m (TVAC40830), 3 m (TVAC40820), 2 m (TVAC40810) and 1 m (TVAC40800).

---

**Product highlights:**

- To connect network cameras to e.g. routers and PCs
  - RJ45 plug incl. anti-kink sleeve
  - Use in multimedia networks and telephone systems
  - Suitable for use with ABUS IP cameras
  - 8-pin RJ45 connections
  - Length 1m
-

TVAC40800

## Cat 5 cable 1m

### Technical Data

Type of cable	Cat 5e	Outer insulation	PVC
Area of use	Indoor areas	Outer diameter	5.2 mm
Connections	8-pin RJ45	Operating temperature	-10 – + 70
Insulation	HDPE	Length	1m
Insulation resistance	5000M/KM
